Abstract of JP2000200282

PROBLEM TO BE SOLVED: To present desired information with user's desired viewpoint so that it is easy to see by using data bases in which a plurality of information which differ in property and content trend, are stored. **SOLUTION:** The data bases D1, D2,..., Dn in which informations differing in property are stored, are provided so that a plane retrieval which is free of hierarchical structure can be performed and a knowledge data base 2 having the knowledge of which data base information is retrieved from and how retrieval results are displayed is provided, and when an information retrieving processing means 1 receives an item indicated by a user, retrieval corresponding to the indicated item of the user is performed according to the knowledge of the knowledge data base 2 and retrieval results obtained from the respective data bases are rearranged by a display control means 3 according to the knowledge of the knowledge data base and displayed at a display part 4.
